About This Software

Between 2007 and 2013 there were more than 28,000 reported cases of unruly passenger incidents. Air Rage is a 90 second Virtual Reality piece that illustrates how changes to air travel may have led to increased aggression among passengers.

Title: Air Rage
Genre: Education
Developer:
Emblematic Group
Publisher:
Emblematic Group
Release Date: 14 Mar, 2016

a09c17d780

Minimum:

OS: Windows 8 64

Processor: i6 Intel

Memory: 8 GB RAM

Graphics: Nvidia 980

DirectX: Version 11

Storage: 150 MB available space

English

Fortunately for you the direction that you were approaching from has a light glade of trees, where you quickly take cover while you carefully examine the people as they go about their (illegal) business. You notice that there's a large number of them with firearms. In fact, too many of them have firearms. While your suit's plating is thick enough to deflect most small firearms' attack, you don't think it can survive being fired on by twenty assault rifles.

"Damn...that's a lot of them," Ami whistles softly. "So," she looks at Balogh. "What's the plan, boss?" she asks.

Balogh looks at her for a bit and says, "Report back to HQ like Altug said. Then we wait for reinforcements." Ami clicks her tongue in annoyance at his suggestions before she turns to look at you. "Fine. Marks, what do you think?" she asks, turning to look at you instead. You frown a little and turn to look at the makeshift port below you. It's morning right now and the sun is rising, so any sort of direct approach would be extremely dangerous since the people can easily see you and open fire.

- You decide to look for a way to sneak down unnoticed and scout out the cove.
- You decide to tweak your suit's radio system so that you can use it as a directional mic.
- You'll try to look for a lone person to interrogate.
- You choose to be a little more creative and use your magic to create a scout for your group.
- You'll just throw all caution to the wind and open fire on these criminals.

Dixiklo ist in the House.. In my first 30 minutes of this game, I have noticed how beautiful the game is, even using only the high graphics setting instead of the ultra graphics setting. The movement so far in the game is spot on, and I haven't noticed any bugs except that if you press escape while in the build menu, the camera is no longer locked. If I were to make the game better so far, I would add small quests in the beginning, like "building your first axe" and giving the user a little more 'how to' in starting the game. A good game to compare this type of quest to would be like 7 Days to Die. (Where the quests can be turned off if not needed but are still there for those who do need it).. Randomly Generated Dungeon,has minotaur in some where. The aggression range is very high,makes of frustrating encounters.Has 1 level + endless mode. 4 items, medpack,gold thread to show the way, cuirass armor,one more item i never found and 1 weapon , a gun. You can not kill the minotaur. Game last for 1h if you dont plan for more random labs with same stuff in it.. A seemingly charming and fun game, this retro pixel adventure quickly grows stale and tiresome with its forced humor and extremely simplistic gameplay. I'm usually a fan of point-and-click adventures and I love silly humor, but this is just an endless stream of the same jokes repeated over and over (e.g. that the player characters is dumb) and bunch of pointless things to click on.

Could have worked if it had been shorter and had more of a gameplay hook. I think of this as a way less successful version fo McPixel.

While the idea is fantastic it was just poorly executed. The isometric 3D camera focused too much on helping the shadow perform their platforming while the other player is left confused as to where they actually are. The whole game seems too focused on the shadow mechanics and the coop elements are weak at best.. free to play airgroup battle game, except nobody plays the game, which makes playing the game pretty dull.... 7.5/10

This is okay. I would definitely recommend it for the price, if you are enjoying My World - Action RPG Creator. Love the Egyptian V desert theme. I also like Anubis' design, although I think the mummies are bit too boney. I would like them to have some more dried flesh on them, so they would look a little less like regular skeletons. Its nice and all, and I am looking forward to the worlds made with this pack. That said, I do have a few minor complaints.

1. There is no icon to mark items that come with this pack. for the most part, they just appear after the base game items. What if someone wants to create a base game only world and accidentally uses an item or a Plains of the Nomad body part in the character creator? The developers should take their cues from EA V Maxis and the way they handle expansion pack items in the Sims games, and mark them with an icon, just in case people forget which items came with which pack. Sure most of the Egyptian items will still out like a sour thumb from the Medieval themed items, however, this maybe much more of a problem later on when they release more DLC with items that could easily fit into multiple different themes.

2. There is no premade game world that comes with this pack, which really disappointed me, since I was hoping to be able to play with the new content from the get go, and it maybe awhile until there are a significant number of worlds out there to download made by other players that use this pack. I was bit upset that the world shown off in the trailer was not included with the release.

3. There are no new female "nomad" NPCs. I was a bit dissatisfied by that, especially since I don't think that of the prebuilt female NPCs fit the Egyptian theme and there are no new feminine body parts with Egyptian themed dress, and the developers would not have had to do too much research to find out how Arab women or even women in ancient Egypt dressed.

All that said, I really love the new content, and maybe some of these minor issues could be fixed via a patch.

Update 7/16/2017 at 5:29pm,

I just noticed that the behaviors for Anubis and the Mummies are not options in the character creator. Hopefully they'll patch that in as well.. Great card game with good replayability and nice progression system.. i didnt like the game because

1. i glitched through the platform that where moving up and down
 2. sometime when i was on a moving platform and i jumped i didnt move at all
 3. there was no sound effects or music so it was really silent
 4. sometimes the lamb didnt want to jump and didnt stop running.
- but i can see potential in the game if the bugs where fixed and some sound and music was added
