Nice Game!

I recommend this!

Make Viet Nam cool!. great game if u like to play games like orwell or paper please. This game is insane!. Anna is my dream girl. After playing this game for 49 minutes and 37 seconds I decided to call it a night, but this morning after I realized that, after she appeared in every single one of my dreams, she was the one for me. The thought of her gently sipping tea under a cherry blossom tree while her hair is blowing in the wind, casually brandishing her Arctic Warfare Magnum rifle while having the signature no symbol taped over her gun scope. I wish one day to be as good as a real-life Anna, who I know sadly will never exist.

I highly recommend this game to anyone who is searching for a waifu, or has lost a loved one and is looking for a new life. 10V10. Love the randomness and expanse of the world. I was able to play and craft things right away, and hasnt crashed at all, contrary to other reviews. Great game, can't wait to dig more into it and build more.. I found this game from the Path of Exile subreddit. BYTEPATH combines the complexity of Path of Exile's skill tree with a relaxing low-bit asteroid shooter. It's really fun to try out different combinations of skills and items and make a super OP build. Once you reach a high enough difficulty, you can loop the game over again and gain an additional passive nodes each loop, which helps you flesh out builds even more.

On top of all that, you can buy the source code and/or follow along a step-by-step guide to make a similar game yourself. The dev is very active with updates and hotfixes, and appears to be super involved with the steam community.

For \$2, it's really a no-brainer. I'd be fine if I paid \$5 for this.

combine this box with that box to make a new box and repeat this process til you've made a few hundred boxes, the end. Unless I'm missing something this game is pretty pointless.. Volt. The Name of the Game where you swing a Battery around to free himself from a Factory before it's crushed or zapped to pieces.

I bought this game on gut Instinct. (Plus I love to support Indie companies in anyway I can whether it be through a showing during one of my Youtube videos, Or just writing them a message saying How much I loved the game.)

Upon writing this I have reached level 15 in the game and the difficulty as stated as started picking up but the game Is so cool in its own way from the chosen graphics to even the way to make some leaps of faith when swinging back and forth (of course avoiding getting cut up by buzzsaws or getting electricuted to death by yellow charged floors and ceilings)

This game is simple to control and just alot of fun for \$5. Not the greatest game on the market, but one game to just help you unwind and really relax playing. (Of course maybe a couple spots you could be using a certain word or two from its rising difficulty.)

Definite Buy for me, and I hope it's one for you too!. Love this genre of games. This particular one, however, contains too much bugs. And the studio itself is not making any efforts at this point to fix those bugs. If you play the story mode, you will 100% encounter bugs which may cause you losing the game. However, less bugs would appear if you play with friends against AIs. It would be a great game if it is bug free. What a shame.. Alot like Terraria! But this is fun!. I guess it's not too bad. Hoped for more though.

Hoped for more in fight gore in arenas. At the current state it's just 2 guys beating on each other until the other one falls.. Can't wait for Esports. I am happy to see this game on PC :). There are a number of negative reviews complaining about the game client, but I didn't run into any of the major issues they complained about. No weird background tasks in my task manager. Hit the 'X' to close the game, and it quit fine. No super lag (just time to load things from the server). All in all it could use some more polish and some bug fixes here and there, but it's by no means unplayable.

Now that that's out of the way, let's talk about the game. The game itself, as many people have already written, is a highly strategic and creative way to battle other players. There's tons of interesting skills and combinations you can come up with, and so many different decks out there to try and beat. The four spheres offer a lot of variety in themselves, concentrating on defense, resource control, attack, and board control (roughly speaking). Within the spheres you also find a lot of variety, each features multiple "families" of units that can combo with one another. Each also has different strengths and weaknesses. And you can make a perfectly strong deck without combinations in particular, if you'd rather throw individually strong units together.

So is the gameplay itself compelling? Yes, undoubtedly. The fact that there's players who've stuck with the game for so many years attests to that as well.

Let's talk about the developers as well, for a moment. The developers listen to their playerbase. I used to play back when the owners of the IP were from overseas, and made bad decisions to try and milk players for every cent. The US team wound up buying the IP, and have since been making the game much more fun and more rewarding to play. No longer are you purchasing options limited to just throwing dice and hoping for good cards. Now you have real options to aim for cards you want, or spin the ol roulette if you're in the mood for a gamble. There's a single-card marketplace, where players can sell each other cards and get rid of duplicates! Not to mention some single player adventures, NPCs to battle, indepth, fun tutorials, and even a crafting system I haven't even gotten into yet. They've made the whole experience ten times better, and they're not going to stop now.

Balance is another important area the devs have improved, creating a subset of the huge card base that's qualified as "Horizons legal". Some cards, qhile fun to play, were just too overpowered or convenient, and I'm glad to see that they've tackled the issue head on. I'm confident future releases will be in the same spirit.

To sum up, if you're interested in a strategic CCG, give Alteil a shot. It's got beautiful art, lore and characters, and most importantly varied and fun way to take down your opponent. The client's not perfect, but the dev's are dedicated and it'll only get better.. this game sucks i keep getting noscoped by some hardscoper 0/5
